EXPERIENCE

Kore.ai Software India Pvt Ltd, Hyderabad Senior Software Engineer

Aug 2022 – Present

- Led backend development of a **high-scale, event-driven system** for Campaigns module (**Voice, SMS, Proactive Web**), leveraging **microservice architecture** handling thousands of concurrent requests.
- Integrated **Large Language Models (LLMs)** to enable **conversation summarization, real-time translation, sentiment analysis** and **contextual recommendations** improving automation and customer experience.
- Implemented a **Generic SMS Channel** supporting multi-provider integration, integrated with **twilio** channel and external database retrieval for dynamic campaign personalization.
- Built an intelligent **customer-agent interaction** platform integrated with **WhatsApp, Telegram, and MS Teams**, resulting in **20% CSAT** and **30% reduction** in **response time**.
- Designed **async-processing** job queues (**RabbitMQ**) with **Trino** (SQL) for analytics, implementing controlled short polling to optimize API bandwidth usage.
- Developed a flexible **campaign scheduling algorithm** using Agenda supporting **daily, weekly, monthly triggers**.
- Developed RESTful API handling **periodic data ingestion, deduplication** and MongoDB indexing using async processing of **large-scale user input data**.
- Integrated **OpenSearch** enabling fast data retrieval for **real-time analytics dashboard** and across multiple components
- Set up centralized logging and monitoring using **Grafana** and **Prometheus**, reducing MTTD by **35%**.
- Streamlined deployment workflows by integrating **Harness-based CI/CD pipelines**, improving release reliability and deployment transparency.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, SQL

Technologies: Node.js, Express.js, REST APIs, Microservices, Redis, RabbitMQ, gRPC, WebSockets

Databases: MongoDB, PostgreSQL

Cloud & DevOps: Docker, AWS, Jenkins, Nginx, CI/CD, Harness

AI/ML: PyTorch, TensorFlow, LLM Integration, NLP, Model Deployment

Tools: Git, Jira, Postman

EDUCATION

Indian Institute of Engineering Science and Technology (IIST), Shibpur B.Tech in Electronics and Telecommunication Engineering

Howrah, India

CGPA: 8.67/10 | 2018 – 2022

PROJECTS

Telugu Speech Recognition and Text-to-Speech (TTS) System | Python, PyTorch, HuggingFace June 2025 – July 2025

- Built a **speech-to-text** pipeline using Pyannote for diarization (**10% WER**) and ASR models for transcription.
- Trained a Telugu TTS model using PyTorch and Tacotron2 for natural speech generation, aiming to scale for multiple Indian languages

Automated Classification of ECG Beats | Python, Scikit-learn, Pandas, NumPy, Matplotlib

Nov 2022

- Implemented a multi-class classifier for **heartbeat classification** following AAMI standard (**MIT-BIH dataset**)
- Applied **SMOTE** for class imbalance and **EMD** for feature extraction, achieving **0.94** accuracy with Random Forest

ACHIEVEMENTS

Outstanding Performer Q3 2025 (Kore.ai) | Recognized for resolving complex customer issues in voice campaigns in the production

SpotLight Award Q4 2024 (Kore.ai) | Awarded for the contribution to the complex campaign dialer module development

Top Performer Q4 2023 (Kore.ai) | Awarded for improving backend reliability and observability for voice campaigns module

LeetCode | Highest Rating: 1443, 600+ Problems Solved
